

are integral to each other and include a predetermined area of structural weakness located between said coupling portion of said first fin structure and said coupling portion of said second fin structure.

5

29. A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material, at least one tear tape structure, at least one fold structure, and an opening located generally opposite said fold structure; a reclosable fastener structure including at least one integral skirt structure of skirt web material extending therefrom; said integral skirt structure including at least one distal margin; said distal margin being coupled to said web material at, at least one location between said tear tape structure and said opening; said reclosable fastener structure extending past said tear tape structure and into said fold structure; said reclosable bag capable of being filled with at least one food product.

20

30. A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material having at least one fold structure presenting at least two sidewall structures having inside surfaces, and an opening located generally opposite said fold structure; a reclosable fastener structure including an integral skirt structure comprising a web material extending therefrom and including

25

30

opposed distal margin structures; said web material of said integral skirt structure being sealed to said inside surfaces at a plurality of predetermined sealing areas; a barrier web material extending between and coupled to said distal margin structures.

31. The reclosable bag of claim 30 wherein said barrier web material extends between and is coupled to said sidewall structures.

32. The reclosable bag of claim 31 wherein said barrier web material is coupled to at least one of said sidewall structures by at least one peelable seal.

33. The reclosable bag of claim 30 wherein said predetermined sealing areas are located on said respective sidewall structures.

34. The reclosable bag of claim 30 wherein said barrier web material is coupled to said predetermined sealing areas by at least one peelable seal.

35. The reclosable bag of claim 30 wherein said barrier web material includes at least one area of structural weakness extending generally parallel to said predetermined sealing areas.

36. The reclosable bag of claim 31 wherein said barrier web material includes at least one area of

structural weakness extending generally parallel to said predetermined sealing areas.

- 5 37. A reclosable bag for filling with at least one food product, said reclosable bag comprising: at least one sheet of web material including at least one predetermined tear area, at least one fold structure, and an opening located generally opposite said fold structure; a reclosable fastener structure including at least one integral skirt structure of skirt web material extending therefrom; said integral skirt structure including at least one distal margin; said distal margin being coupled to said web material at, at least one location between said tear area and said opening; said reclosable fastener structure extending past said tear area and into said fold structure; said reclosable bag capable of being filled with at least one food product.

38. The reclosable bag of claim 37 further including at least one header material located in a predetermined area of said fold structure.
- 25 39. The reclosable bag of claim 38 wherein said header material includes at least one edge structure adjacent said tear area.
- 30 40. The reclosable bag of claim 37 further including at least one tear tape structure coupled to said web material and adjacent to said tear area.
